## PROJECTS

### Book Review Web App

Technologies used:HTML,CSS,JavaScript,python,MySQL

Framework used:Flask

- Book Review web application where a individual can login to web site
- Goodreads api is used to pull information about book reviews and rating
- User submitted rating and review is stored in database

### Private Blog Web App

**Technologies used:**HTML,Bootstrap,JS,python,postgreSQL

**Framework used:**Django

- A blog where i can share my reviews about technology, life&work
- Recent posts were updated and shown on front page
- Users can search for previous posts and share the blog and comment

### Online Salon Web App

**Technologies used:**Html,css,JS,python,ServiceNow

- The main idea of this application is to reduce waiting time and to increase customers
- Salon vendor has a login id and users have one
- once user login user can able to look different salon shops near them
- They can book any one of the salon slot at a location based on user convenience
- A unique QR code will be generated and text message is sent to alert user about salon booking information
- Based on QR code vendor identify and service customer to their need
- (Currently on-going project)
